

Colloquium on Data for Sustainable Development and Decision Making

The Colloquium on Data for Sustainable Development and Decision Making held on 30th June 2022, organized by Department of Statistics. The event aimed to explore the crucial role of data in driving informed decisions that contribute to sustainable development goals. The theme centered on the intersection of data analytics, sustainability, and decision-making processes.

Inaugural Address: The colloquium began with an inaugural address by Dr. Muhammad Fareed, Principal, WMO College emphasizing the urgency of leveraging data to make informed decisions that promote sustainable development. The speaker highlighted the potential of data analytics in informing policies and actions for a better future.

Keynote Addresses: Distinguished keynote speaker Abdul Rajib P V, DD, Beuro of Economics and Statistics, Kannur delivered insightful addresses that touched on various aspects of data for sustainable development and decision-making. They underscored the importance of collecting, analyzing, and interpreting data to understand societal and environmental dynamics. Total 40 students participated in occasion.
