Student centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences

The institute follows various teaching learning methods to enhance the learning experiences of the students and to obtain the desired outcome. Teachers carefully design, evaluate and refine the instructional units of each course consistently for ensuring active learning. The methods adapted vary programme by programme and course by course and are sufficient to help the students for self-evaluation. Advanced Facilities such as ICT enabled class rooms, language lab, state of art laboratories, skill development labs, discussion rooms, dialogue hall and browsing area catalyst the teaching learning process. Proper blend of different student centric and participative teaching learning techniques facilitates classes more interactive and effective.

Internships, projects, practical classes, Study tours and field visits reduce the gap between academia and industry. Students are motivated to use simulation software and virtual Labs for having command over their respective subjects. Hand written Magazines released by students of various departments prove their creativity and imagination.

Learn by doing techniques such as demonstrations, role plays, discussions, Debates, Group Learning, Peer Teaching, Poster Making, Quiz, Student Presentations, Seminars, Workshops, Hands on Training, Problem solving sessions, Puzzles and Games are planned and executed to generate enthusiasm towards career.

Article Writing, Case study, Journal article analysis and presentation create research aptitude among students.

PRACTICAL COURSES

Program Name	Practical Courses
BSc Electronic	Basic Electronics and Network theorems Lab
	Electronic Circuits Lab
	Digital Electronics Lab
	Analog Integrated Circuits Lab
	Skill Development Lab
	Microprocessor & Microcontroller programming and Interfacing lab
	Communication System
	Industrial Visit Report & Project Work Viva voce
	Application based programming in Embedded C& python
	Introduction to python
	Communication DSP lab
	Programming Lab C and Data structures
BSc Chemistry	Practical - 1 Inorganic Chemistry - II
	Physics Practical
	Physical Chemistry Practical
	Organic Chemistry Practical
	Inorganic Chemistry Practical - II
	Inorganic Chemistry Practical - III
BCA	Programming laboratory II data structure
	Programming Laboratory III
	Programming Laboratory IV
BSc Mathematics	Programming Lab C and Data structures
BSc Physics	Core Course V - Practical 1
	Core Course Practical XIV - Practical II
	Core Course Practical XV - Practical III
	Tour Report
	General Physics Practical -1
	Electronic Practical - 1
	Modern Physics practical-1
	Modern Physics Practical II
	Computational Physics Practical (Comprehensive)
	Programming Lab C and Data structures
MSW	Concurrent Field work

AWARDS and ENDOWMENTS

Nandhita Endowment

In remembrance of a versatile poet and a former faculty of the department of english. Nandhita an endowment programme is being organised in every year. The program envisages developing and enhancing students literary skills and competitive by conducting Nandhitha Endowment lecture and literary competitions.

Sreelatha Endowment

An endowment is formed to commemorate Ms. Sreelatha, former Lecturer of Department of Malayalam, by her colleagues, friends and students. The endowment committee organizes various competitions in Malayalam literature and organizes Sreelatha Memorial Lecture every year.
