Attainment of Programme Outcomes and Course Outcomes are evaluated by the institution

The institute efficiently assesses programme and course outcomes at different levels. At the beginning of each course, teachers devise various instruments to assess the students' progress toward outcomes through detailed semester plan. Effective assessment tools are used for continuous evaluation to ensure attainment of expected outcome. Some of the techniques used to assess the course outcome are

- Question banks for different courses are prepared based on the expected outcome with different difficulty level and having good discrimination power
- Unit tests are conducted at the end of each unit to evaluate the attainment of competency demanded by the course.
- Assignments, seminars, Role play, debate and other student centric methods are carefully designed to measure the level of attainment of defined outcome.

Attainment of programme outcome is measured with the following matrices

- Pass percentage of a programme gives a glimpse to the attainment of the specified outcome.
- Students' enrollment in higher studies across the country and abroad
- Placement in companies / industry
- No of students becomes self-employed / Entrepreneurs
- Student satisfaction surveys are conducted by IQAC
