Introduction

At WMO Arts and Science College, cultural and sports activities play an integral role in shaping the vibrant campus life. Each year, in preparation for both intercollegiate and university-level competitions, the college conducts an extensive selection process that spans over a month. These rigorous selection procedures are applied to both off-stage and on-stage events, as well as other competitions.

During this exciting period, students from various departments engage in spirited competitions, vying for the opportunity to represent the college at the next level. This is a time when the entire college transforms into a celebration mode. Once selected, these talented students proudly represent the college at intercollegiate and university competitions.

The college's Physical Education Department maintains a stringent selection and training program for a variety of sports, including football, volleyball, badminton, cricket, and more.

In addition to sports, the campus comes alive with a plethora of cultural activities organized by different departments, cells, and clubs. For instance, the college celebrates Onam annually with flower carpet competitions, Onam song contests, and everyone, including students and faculty, dresses in traditional attire, creating a festive atmosphere. Similar festive activities are organized for occasions such as Christmas, Eid, Diwali, and others.

Moreover, the college encourages departments and clubs to host various academic competitions, including quizzes, debates, and presentations, motivating students to engage in intellectual and cultural pursuits. Exceptionally skilled students are even sent to participate in such events both within the state and beyond. Please note that this report covers only a selection of such events on a yearly basis and does not encompass the Fine Arts Festival and university-level competitions.

Treasure Hunt Competition by the Department of Computer Science, WMO Arts and Science College (January 25, 2019)

On January 25, 2019, the Department of Computer Science at WMO Arts and Science College organized an exhilarating and intellectually stimulating event – the "Treasure Hunt Competition." The competition was designed to challenge the participants' analytical thinking, teamwork, and problem-solving skills. It was a day filled with excitement and camaraderie as students eagerly embarked on a quest for hidden treasures.

The event commenced with a brief orientation by the organizing committee, where the rules and guidelines of the competition were explained. Each team was provided with a starting clue, which led them to a series of locations within the college premises. At each location, teams had to solve a puzzle or riddle to unveil the next clue, which ultimately guided them toward the final hidden treasure.

The puzzles and challenges were thoughtfully designed to test the participants' logical reasoning, lateral thinking, and ability to collaborate under pressure. Participants had to decipher codes, solve mathematical problems, and decode cryptic messages, among other tasks. The

competition demanded a combination of mental agility and effective communication within each team.
