## Environmental Audit Report (2020-21)

WMO Arts and Science College, located in the Wayanad District of Kerala, recognizes the importance of sustainable practices to reduce environmental impact. An environmental audit is a necessary process that helps organizations to identify their environmental impact and improve their sustainability performance. It involves a systematic review of an organization's environmental policies, practices, and procedures to assess its compliance with environmental regulations, identify areas for improvement, and recommend actions to reduce its environmental impact. The WMO College has a policy document on Energy and Environment to ensure optimal energy use while minimizing environmental impact.

### **The initiatives of the college for creating a sustainable and environmentally responsible campus.**

The WMO College has taken following initiatives to create an environmentally friendly campus.

1. Conducting seminars and workshops on environmental issues to raise awareness among students, staff, and the community.
2. Celebrating Environment Day every year to promote environmental awareness and conservation.
3. Offering certificate courses related to environmental issues to equip students with the knowledge and skills to address environmental challenges.
4. Conducting audit courses on Environmental sciences to help students understand the impact of human activities on the environment and ways to mitigate it.
5. Listing all plants and trees on the campus to create a database for better monitoring and conservation.
6. Preparing a Bio-diversity register to document flora and fauna on the campus and promote their conservation.

7. The college is planting new trees and plants every year to increase the green cover and promote biodiversity.
8. The college is not supporting tree-cutting on the campus except in the case of infrastructure development. In such cases, more trees will be planted on the campus to compensate for the loss.
9. College has Implemented proper drainage systems to prevent waterlogging and promote water conservation.
10. College has Installed two rainwater harvesting systems with a capacity of 4 lakh litres to conserve water and recharge the groundwater table.
11. The college has provided platforms for students to engage in environment-related activities through the National Service Scheme (NSS), National Cadet Corps (NCC), and Bhoomithra Sena.

These initiatives reflect the college's commitment to creating a sustainable and environmentally responsible campus that promotes biodiversity, conserves resources and fosters environmental awareness and education.
