## **Students' Feedback on Curriculum**

### **Feedback Analysis**

### **2020- 2021**

During the academic year 2020-2021, regular classes were mostly conducted through online mode due to COVID-19 pandemic. Hence the institution developed domains for feedback for students accordingly. The below-mentioned feedback analysis consists of the following domains on which students have given feedback about teachers; i) Which device you are using for online classes? ii) Do you have sufficient network connectivity to attend the classes? What are the online platforms used by the teacher? iv) Through online platforms, how effectively the teacher communicates the topics with the students? How do you rate the Punctuality of the teacher in online classes? v) Teacher is giving more importance to effectively transferring knowledge to the students, than simply covering the topics? vi) How do you rate the overall performance of the teacher? (Consider the diverse methods used in teaching, promoting questions, timely communication with the students, availability to clear doubts, etc.)

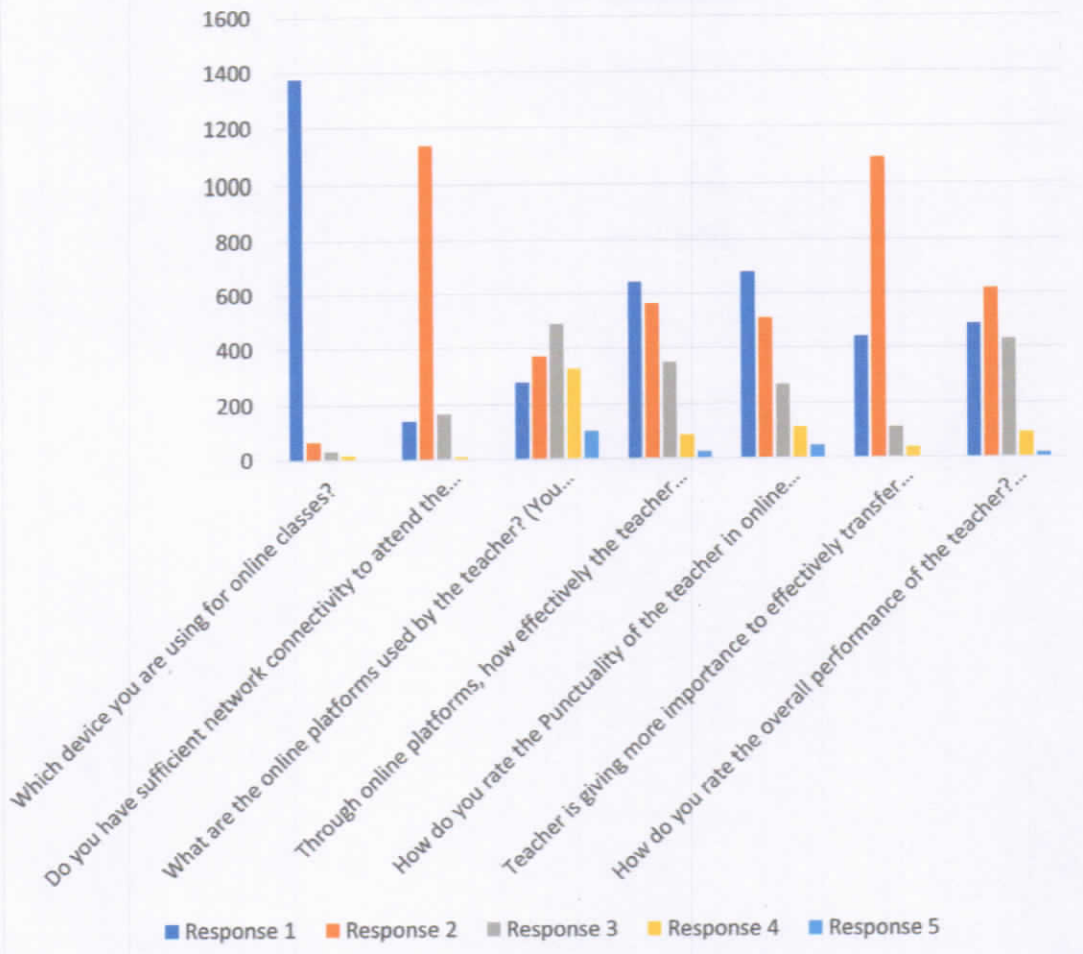

During the academic year 2020-21, the IQAC collected feedback from students of the institution using google forms. The Google forms prepared with the aim to collect realistic responses were circulated among students. All these feedbacks were analyzed by using a 4-point rating scale. The responses to each question are analyzed using Pie diagrams.

The feedback collected from the students signifies that the students are satisfied with the system prevalent in the college and the institution could adapt to the pandemic and the associated shift in the education system from direct functioning to the online platform. In comparison with the previous academic year (2019-20), there is an overall improvement in the rating by students, which shows, the way the institution got equipped with online education with its relentless effort. The specific suggestions and findings identified from the feedback were communicated to the concerned and actions were taken.
